User Manual

⇨Step 1:Download PHP environment:
https://www.wampserver.com/en/

⇨Step 2:
Download our github code file(yachi_web):
https://github.com/y1346025/yachi.github.io.git

To download all the resources in the "yachi_web" folder.

⇨Step 3:
Open your wampserver so that you're in the PHP environment.
After successfully opening the environment, the taskbar will
show the icon.

⇨Step 4:
Put github code in the www file.(you can find it in the wamp64 file which you have downloaded before.)

Make sure the "yachi_web" is inside your PHP environment.

⇨Step 5:

Open any browser and enter : localhost/yachi_web/homepage

⇨Now you can enjoy the website!(=ФωФ=)✧
